

Focus on liquid silicone products Precision silicone accessories

LIQUID SILICONE PRODUCTS PRECISION
SILICONE ACCESSORIES

LYASILICONE Milestone

LYASILICONE VISION

To be proud of employees, trusted by customers, respected by society
A comprehensive service provider of silicone products

2013 Shenzhen

Purchase liquid injection equipment, to provide customers with high-end silicone Products, expanded to 7 groups of machines, annual sales reached 16 million yuan.

2009 Shenzhen

Awarded as Shenzhen high-tech enterprises Industry, annual sales reached 13 million yuan.

2008 Shenzhen

Obtained 2 utility model patents for silicone products for the first time

2010 Shenzhen

Set up extrusion business unit, start for customers Offer extrusion products

2015 Shenzhen

Won the Shenzhen high-tech and national high-tech enterprises, optimize products and customers, annual sales reached 20 million yuan

LYASILICONE PRECISION • Set your "needs"

— Lyasilicone on precision for your needs —

03 Resistance to fouling

The special molecular structure of the German surface is introduced Process, so that silicone products to achieve Fine and smooth anti-fouling effect

02 Shock-proof and fall-proof

LSR is a high molecular weight elastomer, Can effectively decompose kinetic energy; physics Good mechanical properties, good resilience

01 Waterproof and dustproof

LSR injection was used to pack glue essence Close molding process, can be customized A grade of waterproof and dustproof products

04 Soft skin

Unique active functional group molecular knot Structure, fine texture, can be applied Soft and skin friendly products

05 Completely non-toxic

The special molecular structure of the German surface is introduced Process, so that silicone products to achieve Fine and smooth anti-fouling effect

Precision liquid silicone products processing solutions supplier

Factory panorama

One-stop liquid silicone processing solution
Plant area of 80 million square meters
About 150 employees
Professional liquid silicone products high-tech enterprises

Solid state molding workshop

More than 30 groups of horizontal vertical injection molding machines
Germany imports Aberger
Advanced equipment for precision glue injection

Liquid forming shop

More than 20 groups of horizontal vertical injection molding machines
Own mold room

LSR injection molding

50T, 100T, 160T liquid silicone molding equipment

- Increase production efficiency by 20%
- Improved quality stability and consistency
- Production costs are reduced by 10%

One-stop production service provider

- Increase production efficiency by 30%
- Ensure quality and improve efficiency
- Reduce turnaround costs and time

Professional technical team

Multiple sample room

- R&d and production of 6000+ liquid silicone products
- Obtained 3 invention patents (13 patents in total)

Professional engineering and technical team

- More than 10 professional engineers with ten years of experience
- Can open mold custom, to map proofing

Independent mold room

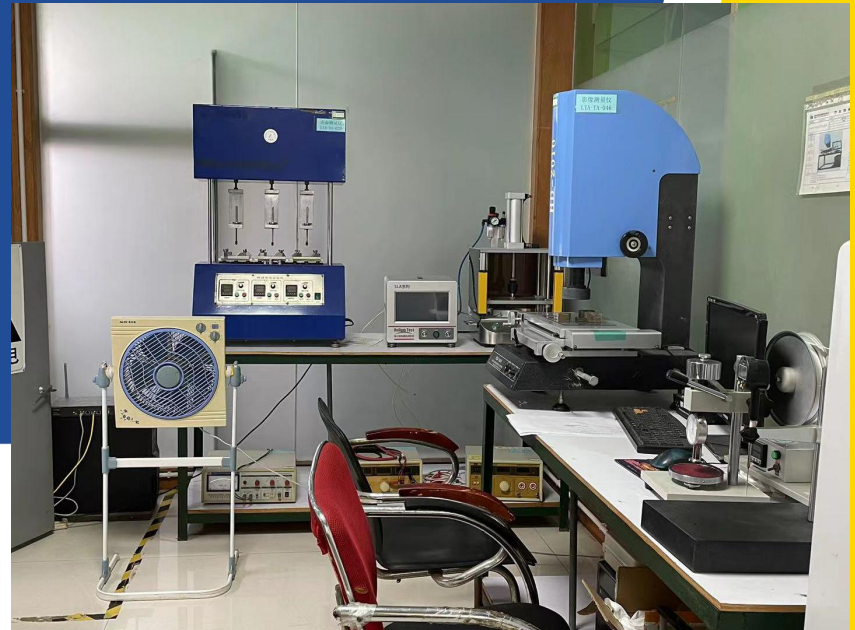

High precision all-round CNC equipment

- Product production efficiency increased by 6 times from 20PCS/H to 120PCS/H
- Greatly reduce product turnaround time by 80%

Precision testing instrument system

- Reduce product defect rate by 20%
- Effectively improve product quality

Comprehensive product inspection services

Production strength advantage

More than 16 years of experience in silicone products With high efficiency, production team,Have cost advantage

Professional quality control personnel

Customer questions, the company promises to quickly accept within 1 hour, 4 to 24 hours to come up with a solution!

Injection molding capacity

With 100T to 250T injection molding machine

We aim to provide customers with perfect one-stop service, in addition to precision silicone design and manufacturing capabilities, we also have injection molding capabilities, we have 100T to 250T injection molding machines, to provide customers with comprehensive services;

防水等级IP68
防水等级IP68

3C electronics industry

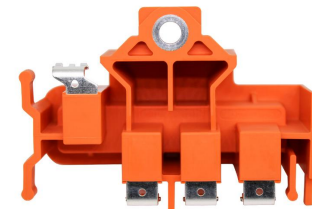

Medical industry

耳挂：硅胶包塑胶

采用液态硅胶包胶成型工艺，一体化成型，
全方位密封，无缝隙

Smart wearable industry

New energy automobile industry

Precision liquid silicone coated products case
